

Email Encryption

From the #1 Email Security Provider

Award-Winning Ease of Use | The Gold Standard in Email Encryption

Works for anyone, anywhere, on any device

Benefits:

- Protect sensitive and confidential data
Get compliant: HIPAA, FINRA, GLBA, and more
- Convenient user experience, minimal portals
- No training needed—no more forgetting to click “encrypt”
- Visibility into encrypted email for improved compliance
- DLP filters act as a safety net for user errors
- Multiple secure delivery options
- Flexible deployment, straightforward integration
- Simple to manage and support from one Secure Cloud interface
- Phenomenal Care support

Customer Ecosystem:

- 90,000+ customers from large enterprise to small business
- Companies with Microsoft 365, on-prem Exchange, and G-Suite
- All federal financial institutions
- Examination Council (FFIEC) regulators
- U.S. Securities and Exchange Commission (SEC)
- 30% of U.S. banks
- 1,200+ U.S. hospitals
- 30+ Blue Cross Blue Shield (BCBS) plans

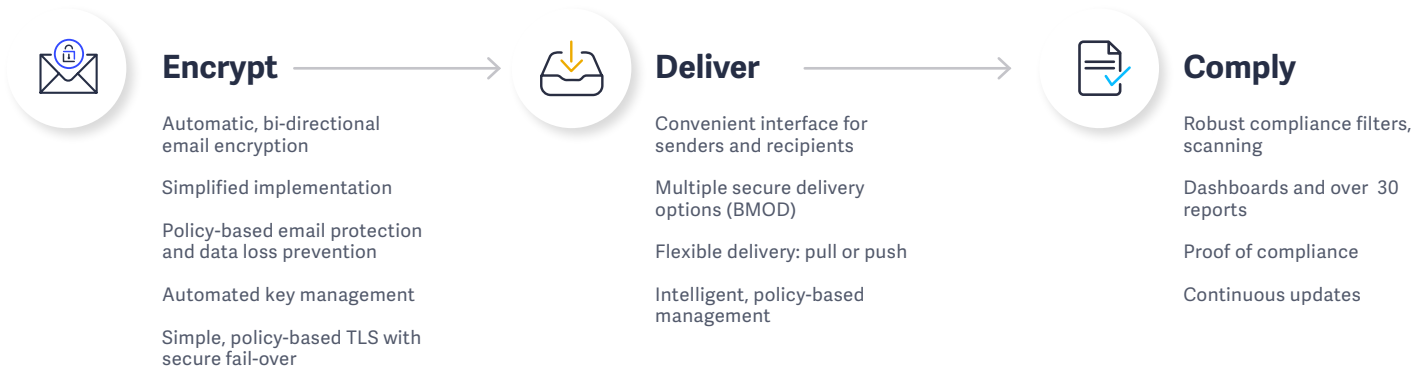

Email is the most vulnerable aspect of your business.

It's all too easy for employees to send sensitive information to the wrong parties over the open internet. But if you secure it, you raise your passive threat defense and empower everyone to communicate safely outside of your network.

We scan the content of all your outbound email and automatically encrypts or takes action based on policies you define, for any email environment to secure your mailbox far beyond its native capabilities.

Features

Simple and convenient, making it easy on users

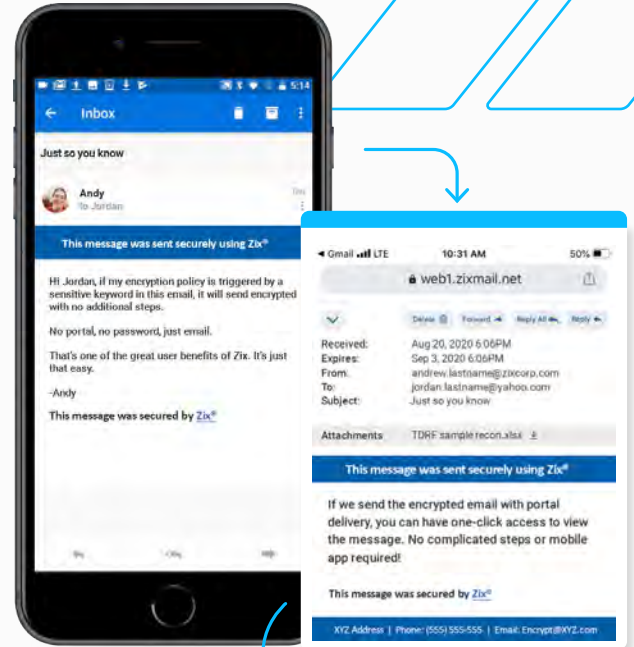

“The installation was very straightforward and the ongoing support has been excellent.”

– Keandall White, VP/CIO, Mount Auburn Hospital

Why Email Encryption Is Different

- ✓ **No-Brainer Encryption Tool:** Significantly lowers the chance of user error.
- ✓ **Largest Encryption Network in the World:** 100% of emails between Zix/AppRiver members travel over a secure network—including between customers and partners.
- ✓ **Transparent Gateway Encryption:** No extra steps or passwords for senders or recipients. As easy as regular email. (Uses S/MIME)
- ✓ **Gold Standard in Email Encryption:** 20+ years experience encrypting emails for some of the most sensitive institutions in healthcare, finance, and government.
- ✓ **Administrator and Partner Portal:** Easy to provision and manage users.
- ✓ **Secure User Portal:** Full email experience and fully customizable. If a policy is triggered and an email is quarantined, it's easy to access.

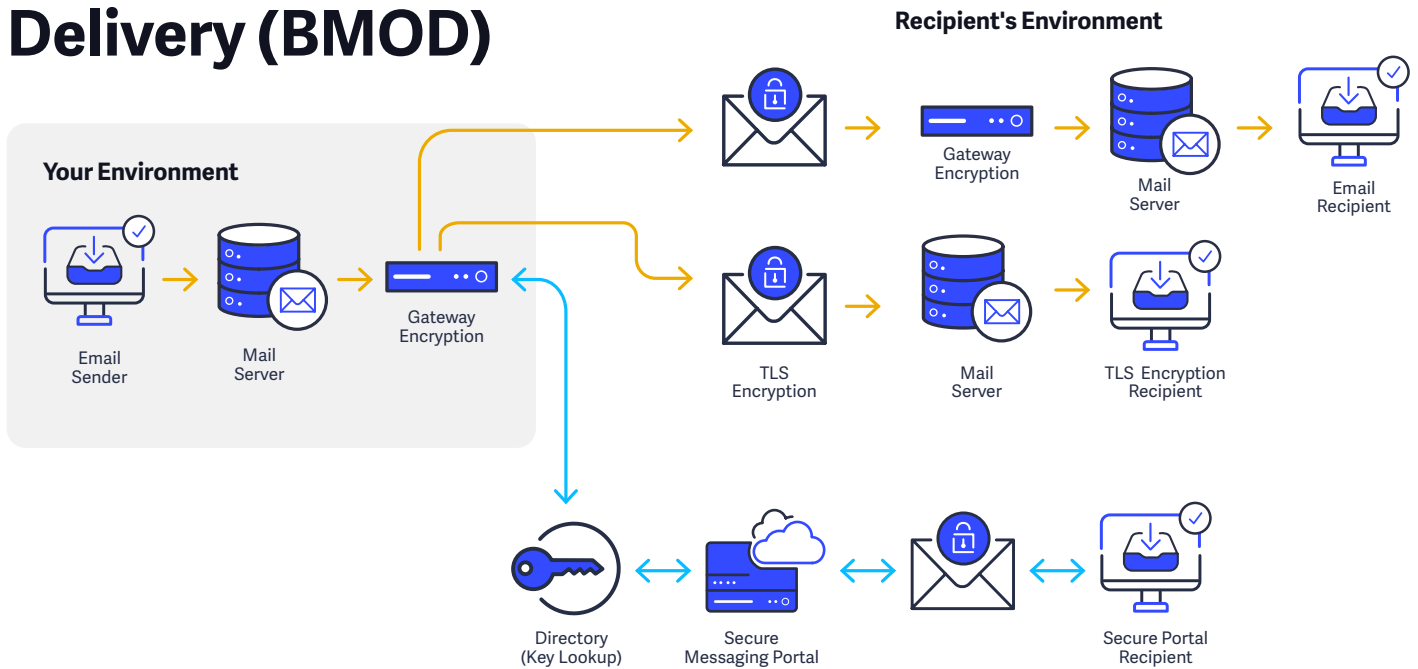

Customer Portal

- User management
- Policy Management
- Content Filters
- Routing Actions
- Branding

The key to good encryption is that it's intuitive. If encryption is off by default, mistakes will happen. If it's on by default, safety is standard. AppRiver's Email Encryption is powerful, but also usable.

Best Method of Delivery (BMOD)

Out-of-the-Box Customer Filters At No Additional Charge

- Financial (GLBA and SOX)
- Healthcare (HIPAA and medical research)
- Education (FERPA)
- General Data Protection Regulation (GDPR)
- Title and real estate industry
- State privacy
- Human Resources
- Social Security numbers
- Credit card numbers
- FINRA
- Custom filters

a zix company

Why Now

It's all too easy for employees to send sensitive information to the wrong parties over the open internet. But if you secure it, you raise your passive threat defense and empower everyone to communicate safely outside of your network.

AppRiver scans the content of all your outbound email and automatically encrypts based on policies you define, for any email environment to secure your mailbox far beyond its native capabilities.

Why AppRiver

Ease of use paired with industry-leading protection. AppRiver Email Encryption removes the hassle of encrypting email and gives teams the peace of mind of knowing that sensitive data sent via email is secure. Using advanced content filters, emails and attachments are scanned automatically and any message containing sensitive information is encrypted for delivery. Plus, the convenient interface means it's actually used.

As an integral part of Secure Cloud, Email Encryption works seamlessly with other AppRiver Security, Compliance, and Productivity services. Together, they form a fully integrated platform that allows partners and customers to create a secure, modern workplace.
